DETAILED ACTION

Lack of Unities Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-15 and 25-26, drawn to a product.

Group II, claim(s) 16, drawn to a firewall.

Group III, claim(s) 17-24 and 27 claim(s), drawn to a method.

The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Where a group of inventions is claimed in an application, the requirement of unity of invention shall be fulfilled only when there is a *special technical relationship* among those inventions involving one or more of the same corresponding technical features, which define a contribution over the prior art. See 37 CFR 1.475. The special technical feature of the present invention, a heat resistant product comprising a ceramic binder and vermiculite granules and 35% -95% of the dry weight of the product is vermiculite and more than 60% of the vermiculite particle is more than 1mm, does not define a contribution over the prior art, as is revealed by Kingsbury (US 3,015,626). Kingsbury

Art Unit: 1775

discloses a thermal and acoustical insulating material comprising a ceramic binder and vermiculite as recited in claim 1 (Col. 1, lines 10-25, Col. 2, lines 25-50, Col.3, lines 1-10, Col. 6, lines 60-67). Consequently, a lack of unity of invention exists. See 37 CFR 1.475 and MPEP 1850.

A telephone call was made to Mr. Martin Novack on 8/15/2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
